

Remarks

Claims 11, 12 and 17-20 are currently pending in the application. Claims 1-10 and 13-16 have been cancelled without prejudice. Claims 11, 12 and 17-20 have been amended into independent form by including all of the limitations of the original base claims and any intervening claims. The specification has been amended to include reference character "31" following the recitation of "outer edge" and to change the recitation of "locking protrusion" to "engagement protrusion". Support for these amendments can be found in original specification paragraphs 24 and 26 and original claim 3. Accordingly, no new matter has been added.

Claim For Priority

The present application claims foreign priority to Japanese Patent Application No. 2002-356488, filed December 9, 2002. The Examiner has failed to acknowledge Applicants claim for priority. However, a certified copy (copy of first page attached) of the above-listed Japanese Patent Application was filed with the instant application, as indicated on the application transmittal sheet and postcard receipt submitted with the instant application (copies attached). Applicants respectfully request that the Examiner acknowledge receipt of the certified copy of the Japanese Patent Application in the instant application.

Objections to the Drawings

The Examiner has objected to the drawings as failing to comply with 37 C.F.R. § 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: "31." In accordance with the Examiner's comments, paragraphs 24 and 26 have been amended to include reference character "31" following the recitation of "outer edge". In view of the amendments to the specification, Applicants respectfully submit that the drawings are in full compliance with the requirements. Applicants respectfully request that the objection to the drawings be withdrawn.

Claim Rejections – 35 U.S.C. § 112

The Examiner has rejected claim 3 under 35 U.S.C. § 112, second paragraph, as being indefinite. Specifically, the Examiner states that it is unclear if Applicant has positively claimed

“the holding wall or a portion of the holding wall” in lines 2-3. Further, the Examiner states that the recitation of “engagement protrusion” line 4 is unclear in light of the recitation of “locking protrusion” in the specification.. Applicants have cancelled claim 3 thereby rendering the Examiner’s rejections of claim 3 moot. However, as claim 3 has been incorporated into currently amended claims 12 and 19, Applicants have amended the phrase in lines 2-3 by placing it in proper Markush form (MPEP 2173.05(h)). Further, Applicants have amended the specification to recite “engagement protrusion” instead of “locking protrusion”.

The Examiner has also rejected claim 2 under 35 U.S.C. § 112, second paragraph, as being indefinite. Specifically, the Examiner states that the recitation of “sealing side member” in line 3 lacks antecedent basis. Applicants have cancelled claim 2 thereby rendering the Examiner’s rejections of claim 2 moot. However, as claim 2 has been incorporated into currently amended claims 11, 12, 18 and 19, Applicants have amended the phrase in line 3 to provide proper antecedence.

Applicants respectfully submit that claims 11, 12 17-20, as amended are in full compliance with the requirements of 35 U.S.C. § 112, second paragraph, and request that the rejections under 35 U.S.C. § 112, second paragraph, be withdrawn.

Claim Rejections

The Examiner has rejected claims 1 and 4 under 35 U.S.C. § 102(b) as being anticipated by U.S. Patent No. 3,336,936 (Mullin). Further, the Examiner has rejected claims 1-10 and 13-16 under 35 U.S.C. § 103(a) as being unpatentable over Mullin in view of U.S. Patent Application Publication No. 2004/0036232 (Fluck). Applicants have canceled claims 1-10 and 13-16 thereby rendering the Examiner’s rejections of these claims moot.

Allowable Subject Matter

Applicants would like to thank the Examiner for indicating that claims 11, 12 and 17-20 are allowable if rewritten in independent form including all of the limitation of the base claim and any intervening claims. By the foregoing Amendment, each of claims 11, 12 and 17-20 have been placed into independent form.

Conclusion

In view of the foregoing Amendment and remarks, Applicant respectfully submits that the present application, including claims 11, 12 and 17-20, is in condition for allowance and such action is respectfully requested.

Respectfully submitted,
Masahiko Yamamoto *et al.*
